Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 November 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 5-7, 9, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicants admitted prior art which includes Lenz et al (5534751) by incorporation.

Applicants admitted prior art (AAPA) discloses a plasma etching apparatus with plurality of pressure confinement rings (Lenz et al -Fig 1), attached to the chamber through plural hanging bores with mating portion (32 and 36), rings of quartz (Abstract), twistingly attached to the chamber via chamber plungers (Fig 1-36), parallel pair of electrodes (Fig 1), stack of at least three rings to confine plasma (Fig 1), RF source connection and impedance matching circuits, low pass and high pass filter (Fig 1) and stepped hangers to hold rings spaced apart (Specification Fig-1) capable for adjustment in vertical direction (Fig 1-105).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1763

3 Claims 11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA including Lenz et al (5534751) by incorporation in view of Yasushi Arai (JP11214487).

AAPA including Lenz et al disclose pressure confinement rings (Fig 1) and hanging bore (32 and 36) but do not disclose twist-lock type mechanism to hold rings in place.

Twist and lock type of fastener are used commonly to attach disk or ring type objects quickly and to snap fit at a distance from a surface. Yasushi Arai discloses bores in proximity to each other to make a twist and lock adapter (Fig 1- 5 and 11a). This type of twist and lock adapter will work with disclosed stepped hanger of AAPA to lock the confinement ring to the hanger as required by claim 11 and 13.

Therefore it would have been obvious for one of ordinary skill in the art at the time invention was made to use the twist and lock type of device of Yasushi Arai to hang confinement rings on the prior art stepped hangers so as to be able to attach and remove them quickly and easily.

Response to Amendment

Applicant's arguments filed 11/7/2003 have been fully considered but they are not persuasive.

Applicant's arguments in regard to newly added limitations have been considered in the rejection presented above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
